## **300 West Median Improvements Project**

**Weekly Update**  
**9-1-14 to 9-7-14**

### **Summary of Work Completed Last Week:**

Last week concrete work began on the pedestrian crossings on 600 North as well as the north side of 500 North. Demolition also began on the median curb between 600 North and 800 North.

### **Upcoming Work for this Week:**

Next week we will begin working again on Tuesday. Demolition will continue on the remaining median curb between 600 North and 800 North. Also, the remaining concrete work on the pedestrian ramps will continue. Once the pedestrian ramps on the north side of 500 North is complete, demolition and storm drain work will begin on the south side of 500 North. Also, on Thursday we plan to begin milling the existing asphalt in preparation for the new median curb that will be installed.

We appreciate all the cooperation we have had up to this point, and look forward to your continued cooperation. If there are any questions or concerns regarding the project, please call the project hotline at 801-828-8988.

### **Traffic Control:**

Traffic control will consist of a closure of the far right hand lane and shoulder closure during working hours in both north and south bound directions. Also, when work is being completed in the median, the inside lane of both northbound and southbound lanes will be closed.
