

CRAFTING THE FUTURE OF WARM SPRINGS

Everything we humans make starts as an idea. And when it comes to Warm Springs, there are lots of them!

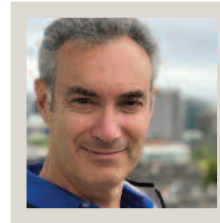

We've been gathering input for over a year about what you as a community want to see happen with this local gem of a place and now we want to get a bunch of you in the same room with our master architect to play with how it all could work.

With a fun mix of big ideas, craft supplies and inspired people like you, we'll generate lots of creative ideas to include in the next steps of the plan we'll present to the city of Salt Lake.

Come play!
No "design" experience required.
Everyone is welcome
(especially kids!)
Just show up!

Meters are free on Sunday on the surrounding streets, or enter the underground pay lot on 4th South.

This creative *charrette* is facilitated by Warm Springs Alliance board member, architect and urban planner David Scheer, who has been

creating award-winning structures for over 34 years.

He graduated with a master's degree in Architecture and has worked all over the world—including Paris, New York, and Los Angeles—developing hundreds of unique building designs. David is inspired by community-driven projects and is eager to dive into the bounty of ideas that are flowing from the people who will actually use the space.
